Testimony to the State of Ohio House Committee on Community and Family Advancement

September 10, 2015

Kristin Freeman, Health Educator
Planned Parenthood Southwest Ohio Region

Over the past several years, Planned Parenthood has been able to provide domestic violence prevention and sexual health classes to our students grades 7-12 as well as parent and teacher education programs as a result of VAWA funding. These educational and prevention programs have provided valuable information regarding healthy relationships, sexual assault prevention, bullying and bystander intervention. Without the VAWA funding, we would not be able to provide such valuable information and skills to our students.
