

Committee Members,

I am a disabled Veteran and I believe strongly that the Second Amendment "Shall not be infringed." That was a simple statement that had a powerful meaning to many law abiding citizens thru the decades. I am 70 years old, have been a gun owner since I was 13 or 14 years old. Never have I shot anyone nor do I intend to so why should you try and change laws that have been in place to punish me as well as other legal gun owners and citizens. The Federal, State, County or city does not have that right. When you start changing what our fore fathers placed on that sacred document you change who we are. My God, has this country gone mad? I for one, will not conform to this panic driven plague. Yes, I cry when I see all these massacres, but the gun did not do it. You need to fix those that do these people, not us. You are acting out of emotions and those that want to change this country I love so much. My God, think do not react.

I want future generations to be able to enjoy the freedoms I have enjoyed so much. Please don't destroy this. If you were raised by parents, uncles, aunts and grandparents that showed you what this freedom meant and the responsibility that went with it, this would be easily understood. Let's make those responsible for these acts pay debt due. Fix the people not the guns and the legal gun owners. I know I am repeating myself, but I am trying to drive a wedge between acting out of emotion. We all deserve better anti gunners as well as gun owners.

Thank you for your time, it means you are still listening. That's GOOD!

Sincerely,  
James A. Blosser
