

## Opposition to HB559 Testimony

Chair Huffman, Vice Chair Gavarone, Ranking Member Antonio, and honored members of the Health Committee:

Thank you for allowing me to submit in writing my testimony. My name is Mary Kay Deal. I am an Ohio parent to a child with Down syndrome who has suffered vaccine injury. I strongly oppose House Bill HB559.

My daughter was born with an extra copy of the 21<sup>st</sup> chromosome which contributes to her immune compromised state as well as her inability to detox the toxic ingredients in all vaccines. She unfortunately was vaccinated due to lack of knowledge and sustained serious vaccine injury. My daughter was regressing terribly as we vaccinated. She has endured ear infections, sinus infections, thrush, severe bowel issues, severe eczema, loss of hearing, and severe apraxia of speech and is now just starting to speak at 8 years old due to our efforts to detox the toxins from the vaccines and heal her body, brain and immune system from the damage. We have spent years trying to heal from these vaccinations. We will not be able to recover her if forced to vaccinate with say for example the HPV vaccine the aluminum alone would impact her horribly.

HB559 would force further doctor office visits where my daughter who is immune compromised is exposed to various pathogens and risks more illness. This bill puts even more work on our school our doctor ourselves. This bill also impacts us financially as we would have to pay for further office visits as well as more admin cost for the school. Also if we are required vaccine education the burden is for us to find and pay for care giver for this meeting as well as the time to attend away from work etc. There is so much in HB559 which puts more stress and burden on our special needs parents it is unacceptable. We work day and night to heal our child of the injury sustained because of vaccination and we have years ahead to continue. The more independent our child becomes as she heals the better she is an active participant in society. If she sustains further injury or further impact to her support system now it will result in later burden on society.

For these reasons I hope you will vote down HB559 thank you for your time and review.
