

To whom this may concern:

I am writing this as a very concerned parent. I feel that as a parent I should have the right to choose what is being injected into my child and my testimony of the difference in my children's health should speak for itself on the ill effects of vaccines.

I am a nurse and once believed all good parents vaccinated their children and were neglectful for not doing so. When my child had a reaction I took him to the hospital. I knew it was a reaction. The paper told me what to watch for and I took him to the hospital because of it. They told me it was an upper respiratory infection. (Really?? Because I had just been at the doctor for a well child visit and he was fine and they vaccinated him because he was fine) So I was sent home. He continued to have issues but I didn't have access to the amount of parents or research in 1998 as I do now. He continued to have what I now know was aspergers type symptoms all through school but back then it wasn't common until several years ago.

I have 7 children now and 3 are fully vaccinated and 4 are not vaccinated. My 3 that are vaccinated are quick to get sick, had so many ear infections and my 4 that are not vaccinated are so healthy and had no ear infections. My 8 year old has only had 1 sick visit in 8 years. I still take them to all of their well visits to maintain a good relationship with their doctor. I am their parent and I do not feel comfortable injecting them with the ingredients in the vaccines. God didn't just accidentally forget to give us an immune system. We are destroying their immune system from day 1 pumping their tiny little perfect body's full of toxins. Please do NOT pass this bill.

Sincerely Concerned Parents,

Pat and Michelle Johnson
