

Dear Committee Members,

Having been informed that our public school had received Ds on the Ohio State Report Card, as an Intervention Specialist, as a teacher and mother, I was very concerned with my daughter's academic opportunities. EdChoice gave us the freedom to make the best decision for our daughter. Without this scholarship, we would be forced to move to another school district deserving of our tax dollars. As an educator, I could not send my child to an underperforming school that has apparently not made best use of taxpayer dollars. Please do not deny my child and so many other students the right to decide their future.

Sincerely,  
Laura Kuenzig
