

To Whom It May Concern,

I have 2 children in the N.Royalton school district.

And are on opposite ends of the spectrum of what each of them need to get the education that is best suited for each of their needs.

I will discuss only one here for the time factor.

I have a son with a current 504 plan, and our school district is doing a very poor job of meeting his needs. His current educational needs are not being met in our district, which is supposedly a "good district". We understand educators have a difficult job. But I also know my child best, and another school can give him the opportunities that all children deserve. He deserves a chance to succeed, and our district is unable to do this.

We have no choice but to take his education outside of N.Royalton.

Knowing that there is a program, like the EdChoice, that is helping us support our child is amazing. It is unfair to now take N.Royalton off the list or change the rules by which the funds would be dispersed because our district doesn't feel like it was fairly graded. Well my child was not fairly graded, or educated either and I am having to deal with that myself.

Please allow the EdChoice to be distributed to ANY child in our district that chooses to go elsewhere and allow parents to decide what is best for their child.

Thank you,

Rina Dabramo
