

Dear Committee,

EdChoice has allowed me to choose which school is best for my child. It has given me the chance to provide my daughter with a better education than I would have been able to provide for her without it. It has meant that she is able to receive the education she needs at the school of choice. Through the program I was able to find a school that best suited my daughters learning skills and needs unlike other schools within the district that would not be able to meet those needs. My daughter is currently in the Edchoice program and any changes to take that away from her will mean that my daughter and many other children's education will suffer greatly. I urge the committee to reconsider this unfair act of horrible policy. Many children's future is relying on it!
