

Starting with the best possible foundation is imperative in today's world. When it came time to decide where my grandson would attend school, it was a no brainer. When we registered at St. Joseph Catholic School, Galion, I knew nothing about EdChoice scholarships, I just knew his education was worth the price. We have outstanding teachers, the best I.E.P. professionals, and a principal that can call each student by name. Can the public schools say that? Our classes are smaller so each student gets the attention they deserve, not get lost in the shuffle. We are a family!

After watching my daughter struggle through school in the same public school my grandson would have gone to, I am so thankful for EdChoice. It has given him the opportunity to succeed, not to have to endure a failing public school system. Think of the opportunities you are taking away from our futures if you discontinue this program! It takes a village to raise a child.

Respectfully
Beverly Smith
