

I want to express my continued support of the EdChoice Scholarship Program. As a family that has never used this scholarship but have witnessed the value it has had in the lives of many families that were able to have true choice in where they educated their children. These families were able to choose a school that aligned with their values and their children's needs. Over the course of the years of our own children's schooling in education, we have seen that not every school is right for every child and we believe strongly that a parent should be allowed to choose a private education if that is best for their child.

I ask that you please support the families that relay on this scholarship program for choice in education. I have always felt strongly that my children's education is not just about them, it is about their peers and the society as a whole. This is not just about my children, my grandchildren, your children, your grandchildren; it is about our children in Ohio. Our future. Let's make them better. Let's give their families a choice.

Teresa McQuate

Mansfield Christian School Board Member

MCS Parent of 2 Alum 2015 & 2019 (Note: my children have graduated. I'm still here investing in the future of all the children.)
