

The Energy and Natural Resources Committee:

[To be entered into the HB 6 Hearing record.]

Decarbonization may be more complex and time-consuming than we think or wish, but it's our only chance at survival. To regressively undo Ohio's energy efficiency rules and its Renewable Portfolio Standards (in addition to charging us to take care of two elderly nuclear plants) would be another step toward our annihilation. Our lemming-like population is in desperate need of leadership from elected officials like you. Please cast your votes against HB6 in the spirit of preserving and renewing our natural resources, and thus, ourselves.

Sincerely yours,

Joan Dowling
