

I am writing you to express my support for HB401.

I own property in the footprint of the Seneca Wind project in Seneca county.

I believe HB401 will bring fairness to rural residents dealing with wind developers, their lawyers and their powerful resources.

The OPSB process does not do enough to help affected residents forced to deal with such a major change to their community. The OPSB guidelines have not kept up with the negative science, health, safety and wildlife reports related to industrial wind turbine projects.

This Bill is very needed, long overdue and I appreciate your support.
