

Dear Mr Vitale,

First, thank you for taking the time to come for the OPSB Public Hearing at Tiffin University regarding the Republic Wind Project. From the public comments you heard, I hope you came to realize our community has well founded fears for our homes, wells, health, and community ethos.

Wind projects in the Seneca County area are so wrong on so many levels. And with the number of proposed projects here, we feel beseiged.

Second, my husband and I wholely support HB 401 being approved. It would be right, just, and fair for any decisions of such monumental change (going from rural to industrial) to have local voice in the matter of industrial wind farms.

Best regards,

Diane and Joe Hudok
