

Dear Mr Vitale,

I am a resident in Huron county Ohio and I built my retirement home in the countryside 10 years to be away from any possible industry next to my home . Norwich township has local zoning and now industrial wind construction projects are proposed for our area . The state is trying to over ride our zoning laws and I do not feel that is right . Please pass HB401 to allow us to decide whether industry is welcome next to our property that we have worked our whole lives for .

Thank you for your time and service for the people of Ohio .

Sincerely,

Frank Bishop
