

To whom it may concern:

I am Gabrielle Runion, I live in Bloom Township, Seneca county, Ohio. I will be directly impacted by MASSIVE turbine projects, without any say in the matter. Without a vote, our voices cannot be heard. I cannot afford lawyer fees, and you will also directly, NEGATIVELY effect my assets, essentially robbing me of what I have worked for. My health and tranquillity, will also be negatively impacted without even being given a chance. At least with a vote I would be able to be part of the decision. If so many people are in support of the projects, it wouldn't be but a little more time to ask first. I am not sure why this would even be argued against. Except to force the projects, for financial reasons.

I do support carbon free and green alternative energy. I do not support forcing large industrial machines in my residential neighborhood, where MY children play, live, eat, and breathe. I have a host of medical issues (the biggest being MS), I do not wish to see how they will effect me. I was here first, I should not have to fight for my own home, and pursuit of happiness. Because somebody now wants to take my happiness away, put my health at risk, and rape my landscape, to make a buck, and call it "green" energy, so we look good. There are other carbon free energy options, that are truly efficient, without all the negative effects of wind.

I THANK YOU FOR YOUR TIME. Please give support to HB401.

Sincerely,

Gabrielle Runion
