

Dear chairman, I would like to Express my full support for HB 401, the majority of residents in our township would like to have a say in whether or not to allow industrial wind turbines in our area. The residents have growing number of concerns regarding noise pollution, setbacks, environmental problems, etc. This bill I feel is the only way for our residents to have a say in what goes on in there neighborhoods in which they reside, and not allow government officials (who do not live in their area) make decisions in which will affect the rest of their lives. We would appreciate your support in bringing a local vote for our community.

Kenneth W. Bish
