

Dear Mr Nino Vitale,

Energy/Natural Resources Committee

Committee Clerk

I would like to voice my opinion on HB401 if it matters to anyone. From the beginning of these Industrial wind turbine projects being proposed I have contacted many Senators and Representatives and told them the only people that are going to benefit from these projects will be Lawyers. We the residents living in these proposed projects do not have the money to fight large corporations like these. We live in the country for our own individual reasons and now we have absolutely no say even with local zoning to get a say in the matter. The Ohio Power Siting Board is a joke if you think that is voice on whether the people in the project areas want these projects. The meetings and hearings I have attended seems to be just a way to make the people feel they have some input. We should be able to control our own zoning. Let the people decide please.
