

To Whom All It May Concern,

I have been a resident of Seneca County my entire life. My husband for the last 15 years. We have never wanted to leave, never even thought about it until now. These Industrial Wind Farms if built will change life as I have known it for over 50 years. There are so many issues but for my families health and safety are at the top of the list. For the first time in my life I may need to move because my personal health issues as well as a child and grandchild may be impacted by frequency issues such as infrasound. We really do not care what any experts that Apex or Spower have said with out them experiencing it first hand. I believe people who I have spoken to that are living proof of the harm to our health these things can cause. Shouldn't we the people living the foot print have a voice? Do we not matter? What if it was you and your family? I am so saddened by the lack of care for the people in this area. None of the wind reps live here nor do anyone from OPSB as far as I know...why do they get to decide what we want surrounding are families and communities? Shouldn't we have that decision? Thank you for listening.
