and Senate

Re: HB 401
SB 234

As land owners in Erie Co., northern Ohio, we are greatly concerned about the 'green energy' wind turbines' being jammed down our throats. These inefficient monstrosities will forever mar our horizons and affect our health and environment. They will also have a negative affect on our property values for generations to come. They are only being built because of the billions of dollars in tax incentives being wasted by our government to support them, not benefit the communities where they are located.

Please allow the people living in these communities to have a voice in what happens where they live! It is not proper or fair that the Ohio Power Siting Board has the only say on if the turbines will be built or not. Please vote yes on HB 401 and SB 234 to allow citizens to have a voice with their votes!

Thank you
