

11/14/2019

Members of the House of Representatives and the Senate,

I am writing to ask you to support HB401 and SB234 and give a voice to the local residents in individual townships to actually vote on industrial wind turbine projects proposed to be constructed in their communities.

This is not a "Not in My Backyard" reaction. Ever since the wind company approached me about signing a good neighbor agreement, I have spent countless hours researching wind projects. I have come to the conclusion that people from all over the world who are living with these turbines can't be making up stories. The issues with shadow flicker, noise, and environmental impact to wildlife are real.

The inefficient operation, relative short life span, and disposal issues argue against ever building them in the first place.

Respectfully,

Deborah Weisenauer
