Legislators,

Thank you for taking the time to read my feelings on Industrial Wind Turbines. My name is Dennis Alt, and I was born in the great state of Ohio 65 yrs. and 8 months ago. My family farm has a deed dating back to the 1780's so I understand being a Buckeye. My Maternal great grand -father came to America from Germany, wanting to be free to live his life without being told, free from corruption and bribery. He also wanted Religious freedom, and he found them in rural Northern Ohio, Seneca and Huron counties, and he succeeded. His wish was of one man and all men equal with the same say in the government, the right to vote! The idea of government of the people, by the people, and for the people was great. My grandfather left his home in Ohio and went back to the homeland to fight for these rights in the war to end all wars World War I. My Father and his brothers fought in World War II and the Korean War, all from Ohio for the same principals as Grandfather. As you can see this was very important to all of them, even to the point of losing their lives to save them.

After the Civil War, a group of not so righteous people called carpet – baggers invaded the South with lots of money carried around in bags, with tall tales, schemes, scams, with one intention of taking everyone for all they had. The money was made during the War by doing nothing, or over charging the government for goods. They seemed to be unstoppable. They would swoop into an area, tell tales of riches and then sneak out in the dark of night after devastating all involved. This is how I feel now with regards to Industrial Wind Turbines. They have been given the State on a Golden Platter, which my defense is to prove to OPSB that we don't want them. How is this possible, me the Ohio tax paying resident, life- long resident, a Buckeye! Shame on all of you for not letting me at least have the hard fought right to vote on what happens in my area, one man one vote, not my thousands acres of land as compared to my small spot. They are carpet-baggers in modern times, they bought out my local government long before I even knew about them, I was left on the outside in my own township no voice to complain to because of a gag order put on them by their signing leases. They use my tax dollars to fight me, I have to use my own money to fight them Really!!! You can change that by passing these bills, let me have my vote, the OPSB is a dinosaur, take them out of the equation until later. My right to vote needs to be upheld, *don't let me become a marginal minority, I'm a BUCKEYE!*

For your consideration,
