

November 15, 2019

To the Honorable men and women of the Ohio Senate,

I strongly support SB 234 giving a local vote on whether wind turbines are built or not in communities. We are the people who live in the townships that will be affected for the rest of our lives and our families' lives.

I am living in an approved wind farm site, which is in Greenwich Township. We have given our 2 daughters and their growing families land to raise their families on. We have a joint family homestead where we raise cows and we raise hay and we raise vegetables together. The proposed wind turbines will be $\frac{1}{2}$ mile, and $\frac{3}{4}$ of a mile from our homes. Our grandson plans on building a hay business on our farm after we are no longer able to farm as it connects to our property.

We are separated by a double set of railroad tracks, so we are not considered to be adjacent to the project, but we certainly are in the view shed of it in our back yards.

We should have a say because we will have to put up with all the negative effects of the industrial wind turbines on a daily and nightly basis as well as our children and their children. This is not right, having no say in the matter.

Sincerely,

Marcia Ledet
