

Dear Sirs,

I am writing in concern for the future of our great state of Ohio. There are many citizens against the proposed wind turbines coming to our community.

I support renewable energy and it is very important for our future and future generations. The current proposal is not appropriate for our area.

The greedy corporations are only worried about making more money for themselves. They are using landowners to achieve the all mighty dollar. In the end who benefits most? Put it to a vote so people have a choice to express their concern and let the people decide

Sincerely yours

Sue Ann Miller
