

December 3, 2019

Representative Nino Vitale, Chair
Energy and Natural Resources Committee
The Ohio House of Representatives
77 South High Street
Columbus, Ohio 43215

Dear Chairman Vitale,

I am a landowner in Groton Twp. and I am for the wind/solar energy project. House Bill 401 is unfair to the landowners of this township. Where was a bill for the gas pipeline or Davis Besse? Why is this project being singled out?

Some farmers own more than one farm and they could not live in the township where this project is located and thus they cannot have a vote. This is very unfair to this person/persons. I am such a person. I no longer live on my farm and I live outside of this township so I have no voice in this decision if this bill gets passed.

My son lives in Irving Texas and he is an electrical engineer. There are several wind turbines in Texas and he says no one has any problems with them. He cannot believe we don't want the jobs they bring or the increase in revenue. This area needs to keep up with the new technology they bring. Renewable energy is the future and we need to get on board.

Sincerely,
Mary Musko
