Chairman Oelslager, Vice Chair Scherer, Ranking Member Cera, and members of the Ohio House Finance Committee, thank you for the opportunity to provide sponsor testimony on House Bill 11, which works to reduce the rate of infant mortality in Ohio.

Governor DeWine has shown that mothers, children, and families are among his top priorities, and this legislation expands on that. Mothers receiving Medicaid funded services in Ohio consistently face lower health outcomes across the state due to lack of access to quality health care. HB 11 focuses on four components: tobacco cessation, oral healthcare, lead, and group prenatal care.

To start, HB 11 would require that Medicaid health plans cover all FDA approved tobacco cessation medications and therapies. As we know, smoking during pregnancy increases the risk of health problems for developing babies, including preterm birth rate and low birth weight. Coverage of tobacco cessation products is one way to reduce these problems, and it also will improve the health of the mother.

Secondly, the bill allows for pregnant women who are on Medicaid to receive two cleanings during the year in which they are pregnant. Right now, Medicaid only covers one cleaning annually for individuals 21 and over. Pregnancy causes hormonal changes that increases the risk of gum disease, which will affect the developing baby. Additionally, HB 11 allows for dental hygienists to provide oral education to pregnant mothers, both who are on Medicaid and those who are not, in a group prenatal setting. The group prenatal setting is beneficial for pregnant women to share their experiences and build a sense of community.

I will also note that HB 11 was amended in the House Health Committee. The amendments clarified how dental hygienists are paid and clarified which entities are eligible to receive planning grants for group prenatal care. Representative Howse can speak to the other amendments. Additionally, HB 11 passed out of the Health Committee with a unanimous, bipartisan vote.

Thank you for the opportunity to testify. I will turn it over to Representative Howse to speak on the other components of this bill, lead and group prenatal health care. At the conclusion of her testimony, we will be happy to take any questions you may have.
