

May 29, 2020

The Honorable P. Scott Lipps
Chairman, House Health Committee
Ohio House of Representatives
77 S. High St., 13th Floor
Columbus, OH 43215

Dear Chairman Lipps and Ohio House Health Committee Members,

On behalf of the Lupus and Allied Diseases Association and the millions of Ohio residents both directly and indirectly affected by autoimmune conditions and other diseases of unmet need, I urge you to please support HB No. 469 an act to amend and enact the insurance code to prohibit certain health insurance cost-sharing practices.

Copay accumulators are a relatively new insurance benefit design being adopted by health insurance plans that prevent patients from using copay cards or coupons to cover their out-of-pocket expenses. This cost-shifting mechanism changes the way an insured individual's out-of-pocket contributions for prescription drugs are calculated. These copay accumulators do not take into account any discounts or coupons that the insured person receives from the drug manufacturer when calculating the insured individual's out-of-pocket expenses and therefore does NOT count toward the patient's maximum out-of-pocket limit.

This practice shifts the cost towards patients as the insurance plan are essentially "double dipping" by requiring the patient to pay their normal copay and still receiving a discount or coupon from the drug manufacturer, while taking longer to satisfy their deductible. This unfair design is especially challenging for individuals with high deductible or high copayment requirements in their health insurance plans.

Given the current global healthcare crisis in which Ohio families and others throughout the world are experiencing hardship in dealing with the COVID-19 pandemic, individuals already struggling to manage their chronic and rare medical conditions are facing the additional challenge of covering the cost of their medication and accessing appropriate healthcare. Copay coupons and cards provide financial relief to patients through manufacturer programs created to offset the cost sharing associated with certain treatments while assisting patients in meeting their maximum out-of-pocket limits. Copay assistance programs provide patient access to vital medication that would otherwise be unaffordable.

Ohio has a longstanding record of providing access to affordable healthcare as well as some of the strongest patient protections in the country. The proposed legislation discontinues the use of copay accumulators statewide by requiring insurance companies and pharmacy benefit managers

to apply price reduction instruments for out-of-pocket expenses when calculating an insured individual's cost-sharing requirement.

The Lupus and Allied Diseases Association was founded in 1978 and is a national non-profit organization led by people with lupus and allied diseases and their loved ones who are dedicated to ensuring that the patient perspective is included and recognized as an equal stakeholder in the healthcare, regulatory and public policy arenas and across the research continuum. It is our goal to improve access to care and quality of life by fostering collaboration among stakeholders and by wielding the patient voice as a catalyst to advance innovative advocacy, education, awareness and biomedical research initiatives that will identify causes, advance better diagnostics, and discover superior treatments, and cures.

As patient stakeholders who represent patients and loved ones dealing with serious medical conditions on a daily basis who strongly support establishing essential patient protections that improve access to vital therapies, we strongly urge your support and passage of HB No. 469 to stop this unfair practice and to help individuals afford the medication they require to remain active. The urgent need for this legislation has only been intensified during the pandemic as countless Ohio families face financial uncertainty. We urge the House Health Committee and state legislature to support this legislation and stand with patients by prohibiting copay accumulators and requiring health insurance plans to count all dollars towards an insured individual's deductible.

We must remain vigilant in protecting Ohio residents while promoting unfettered access to life-enhancing and lifesaving treatments.

Please contact me at 315-264-9101 or kathleen@ladainc.org if you have any questions.

We thank you for your support of strong patient safeguards.

Respectfully Submitted-

Kathleen A. Arntsen
President & CEO
