

We purchased our farm in 1955 and have lived and farmed ever since. The purposed effect of the bike trail would cause 13 acres to be landlocked.

Across the road we own 36 acres which have two large ponds of water 32 ft. deep, straight cut sand rock. This could be a real danger to children and adults. In the past, we have had a lot of trouble with people trespassing to fish. They would get aerial maps and think the lakes are government land.

The increased lack of respect for our own ground makes it undesirable to have a bike trail surrounding our property.

I hope you will pass House Bill 476.
