

As an Ohioan, Board Certified Naturopath and Board Certified Practitioner I support HB624.

Acton's math is overly weighted on deaths and does NOT account for real time data and that is DANGEROUS! Acton's actions have been negligent and Ohioans deserve the TRUTH. Ohioans deserve to know to date that nursing homes account for 79% of the covid deaths in Ohio and to know the underlying health issues of the deceased and that the general population of healthy people are at low risk of covid.

Ohioans deserve all facts, good and bad. This information is crucial for economic policy and the decisions that directly affect our livelihoods made on our behalf.

I urge you to vote **YES** on HB624.

I pray the other representatives vote **YES** on HB624 too.

Respectfully,
Jennifer Norris, BTCN, BCHHP
