I depend on mail in voting as I am partially disabled. I requested a new voter registration when I reapplied for my food stamps and it was never sent to me so I didn't get to vote in the primary which I was upset about. It's hard for me to stand in lines at the places where you would typically get a new voter registration so I rely on having it mailed and on then mailing my vote. I hope it doesn't become harder or impossible. It would effectively cut me out of the process of participation in elections.

I am representing myself. Today is Monday June 1st 2020 and I am against the bill that would make it more difficult to vote.
