

H.B. No. 6 : Opposition View Lordstown, OH by Mayor Arno Hill

Over the last 3 years, the G.M. Lordstown plant has LOST all 4,500 union jobs, the plant is now closed

Lordstown is a population of only 3,300
GM's closure has had dramatic negative financial impacts on Lordstown and the entire Youngstown region

The Legislature has not offered any "Bailout" to Lordstown via a new law

However, this same Legislature is suggesting a \$ 300 million/year BAILOUT that will primarily BAILOUT 2 bankrupt nuclear plants in Ohio

The loss of 4,500 direct plant jobs at G.M. far exceeds the loss of 1,480 direct jobs at the Davis-Besse and Perry nuclear plants. . . by 300%

This Bailout also de-stabilizes the current open and free power generation market in Ohio and thus jeopardizing a new \$950 million gas-to-power plant planned for Lordstown

Such a new energy Trumbull plant will immediately bring 2,000,000 man hours of union construction labor and \$ 26 Billion dollars of economic benefit to Lordstown. Warren and Ohio as a whole

This H.B. Bill No. 6 should be rejected in total !
