

Chair Wilson, Vice Chair McColley, Ranking Member Williams, and Members of the Senate Energy and Public Utilities Committee,

Thank you for taking the time today to learn why I oppose HB6.

The health of our planet and the people who live here is important to me. Wind projects in Ohio provide sustainable energy while improving air quality in our community. I do not think we should be adding restrictions to a low impact natural energy resource like wind energy, while bailing out companies that produce negative externalities to our health.

I support wind projects in Ohio because I know the health of my community will benefit from wind development. I hope that you too will consider the future health and air quality of our state by opposing HB6.

Thank you,

Fran Young
Columbus, OH
