Senator Steve Wilson

Chairman

Senate Energy and Public Utilities Committee

Attention Senator Steve Wilson:

I'm writing this letter in support of HB401 and SB 234. I feel this will impact our lives and feel we have the right to vote on this proposal.

How can some big company come in and just put these wind turbines in a populated area where the land owners around have no say. They will not have to live under and around these things.

They are an eye sore and will affect our property value from now on. We chose to live in an area where things are peaceful. They want to take this away from us.

Also our eagle population will be affected. Also bats and other birds and animals.

I have traveled the United States and Ireland and Spain and all I see are unpopulated areas where the turbines are placed.

We need to have the right to vote on this issue. We live in the United States.

Our health is also at stake.

RE: SB 234

TO WHOM IT MAY CONCERN:

As a resident of Monroeville and Huron County, Ohio, I am writing to you regarding SB 234 and the concern of the planning and construction of industrial wind turbines energy projects in my area.

I, personally, oppose the wind turbine energy on several levels from civilian radar systems affecting our security to the destruction of wildlife habitats (birds / bats) that would affect our environment. Also, a very important factor to consider is: If there is no wind; there is no power.

It is imperative, we, as citizens, have the constitutional right to vote either for, or, against, these proposed projects that will have a direct impact on our environment as well as the wellness of our livelihood.

I am asking as a resident of Ohio and Huron county to have the right and be able to vote on the SB 234.

Sincerely,

Rosalie McPherson

17 January 2020

Senator Steve Wilson  
Senate Energy and Public Utilities  
Committee

Dear Senator Wilson,

Imagine sitting on your front porch having a coffee, where there was once an expansive rural landscape, now there is a huge wind turbine...A turbine as high as the towers in downtown Columbus.

Big wind projects have an impact on the communities in which they are located, and the citizens of that community should have a say as to whether they should be located there.

Developing alternative forms of energy is an important endeavor, but one that must take into consideration the residents in which they serve. Communities should not have to endure huge industrial structures that have been imposed on them by a corporation, that developed these projects without giving all citizens a say in the matter.

I support Senate Bill 234 to give all citizens the right to vote on what happens in their own communities.

Thank you for your consideration,

Sincerely,

Lisa Tyler

Senator Steve Wilson  
Senate Energy and Public Utilities  
Committee

Dear Senator Wilson,

This letter is regarding Senate Bill 234, which will give citizens a voice in the implementation of large industrial projects in their communities. Big wind projects can dramatically change the rural landscape thereby impacting the communities in which they are located, the citizens of that community should have a say as to whether they should be located there.

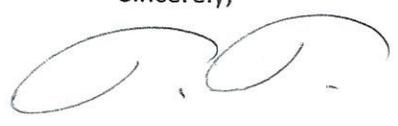

Corporations involved in the development of alternative forms of energy should take into consideration the residents in those communities in which they wish to locate. Communities should not have to endure huge industrial projects, with no say in the matter.

I support Senate Bill 234 to give all citizens the right to vote on what happens in their own communities.

Thank you for your consideration,

Sincerely,

Tym Tyler

Attn: Senator Wilson, Chairman Senate Energy, and Public Utilities Committee

I am writing this letter in support of SB234. I grew up in Groton Twp., Erie County. I lived here my entire life. I would like to keep this great place to live and raise my family like it is. By turning this area into an industrial community you would be forcing people to leave the area. We enjoy so much that this area has to offer. We hunt deer, fish and watch eagles. By not allowing us to have a say or a vote you would be taking this away from us and our children. The wind industrial should not dictate where we live. With the passage of SB234 it will give all residents the opportunity to have a voice and a say on these wind projects.

I am asking that all senators support this bill so that local residents can be heard and enjoy this great area for years to come.

Sincerely,

Scott Eisenhauer
