Senator Steve Wilson, Chrm Senate Energy and Public Utilities Comm

Reg: Seneca anti wind projects

Dear Sir:

This is a request to consider our concerns as citizens of the areas affected by the wind turbine projects In the Seneca, Huron, Erie areas. It is my concern that we are not given the opportunity to vote on the setbacks and issues of these turbines are serious concerns all of us taxpayers, and people who will be living around these turbines. They are devaluating our property, and destroying our future.

We as citizens should have a local voice in these matters. We have only a few who will reap the financial end of this projects and the remainder of us will live with the decision we had nothing to input about.

I am a parent of an Autistic son, and am very concerned of the effects that I have studied, that these turbines cause the disability persons. I am also a farmer and taxpayer and concerned what these turbines will affect as my well sets on a rock layer, being 2 miles of a stone quarry, and have livestock to water everyday.

I urge you to seriously consider SB234, and HB 401 to give us the citizens who live and work the land in these project areas to have a voice and right to vote on these local issues.

Thank you in advance for your kind consideration of our concerns and encourage you to support our request.
