

Senator Steve Wilson, Chrm. /Senate Energy & Public Utilities Comm.

Reg: Seneca-anti Wind Projects

Dear Senator:

I am asking you to seriously consider the concerns of us citizens in these turbine projects, and asking your support of SB234, and HB401, in regards to giving us taxpayers and folks who will be living within the limits of these turbines the right by law to vote on the issues regarding our welfare and environmental threats from these turbines. We own our land and homes and will be affected by the setbacks, noise and pollution from these turbines. We should be able to vote on these issues that are coming into our lives and affecting the value of ours land, the safety of our environment, and the nuisance and destruction of our roads and water supply, that we rely on for our living and animals needs.

Our health and safety in the rural areas is threatened by these mechanical (monsters) preventing Lifeflight to get to serious health risks, and accidents.

Please consider us, the constituents who trust you by your governing position, and who vote for you as our representation. We pay high taxes and as farmers are good shepherds of the land, and ask you to give us the opportunity to vote as we see fit to maintain, a healthy and safe place to live and raise our families. Please support the bill to give us the right to vote on these concerns in our local areas.

Sincerely,

*Kathryn Slingwine*
