Senator Steve Wilson,  
Chairman Senate Energy  
and Public Utilities Commission

Dear Senator Wilson,

I am writing you concerning Senate Bill 234.  
I would like to have a say in the wind turbines  
that are proposed to be installed in my area.  
I feel we, the property owners, should have a  
vote on items that will impact our living  
areas.

Please consider voting "yes" for S.B. 234.

Thank you,

Kay H. Bishop

Senator Steve Wilson  
Chairman Senate Energy and  
Public Utilities Commission

Dear Senator

I am writing concerning the wind turbine projects. I believe the people living in the areas should be able to vote on these projects. Will these things be there forever? Will they keep them repaired and operating or will they deteriorate and just clutter up the environment?

We live in a rural area for the peace and quiet of country living. Will you please support SB 234.

Douglas C Bishop

To: Senator Steve Wilson, Chairman of the Senate Energy & Public Utilities Committee

My letter to you is concerning Ohio Senate Bill 234, which regards the regulation of wind farm and turbine setbacks. Our family and other neighbors are very interested in this legislation as it deals with modifying wind turbine setbacks and would permit a township vote on issuing certain wind farm certificates. The reason for our interest is because this bill would give a local voice to each township in deciding if a wind project should proceed or not. It is my understanding that there currently is no way that local residents can directly have a voice in deciding if a wind farm project is built in their area.

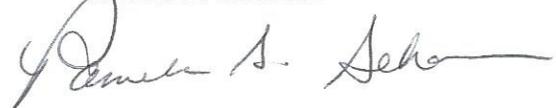

For this reason, my wife Pamela and I are in favor of supporting Ohio Senate Bill 234 which gives a voice to the people who are directly impacted by having a wind farm built in our township. I would like to ask for your support of Ohio Senate Bill 234 as it is being considered. As it currently stands, we are facing the potential of the Emerson Wind Project being built in our area and feel helpless in our opposition to having large wind turbines built so close to us. We do not want to have this wind farm forced on us along with the long-term negative effects that they bring. Once these giant towers are built, the damage to our farms, drainage, roads, and beautiful landscape will be gone forever. We are asking for your help by supporting Ohio Senate Bill 234 so that everyone in our rural townships has a voice in deciding where wind farms will be built and not just the Ohio Power Siting Board in Columbus. We, along with many of our neighbors, would like to have a voice in protecting our land and homes from decisions made so far away. We want the opportunity to vote against having wind farms built next to us and we ask for your support of Ohio Senate Bill 234. Thank you.

Sincerely,

Robert W. Schaffer

Pamela S. Schaffer

To: Senator Steve Wilson, Chairman, Senate Energy & Public Utilities Committee,

We are writing to you concerning Senate Bill 234 which gives local voters in each township a vote on the wind turbine project. This would give us some voice and some local control.

William and I are definitely in favor of this Senate Bill 234. We want to have a vote in this proposal to have or not have wind turbines erected in Norwich Township where we reside. We do not want these turbines forced on us if we do not want them on our property. Please help us get this Senate Bill 234 through so our land can be protected against the wind turbines by our votes. Thank you.
