

Attn: **Senator Steve Wilson, Chairman, Senate Energy and Public Utilities Committee.**

SB234

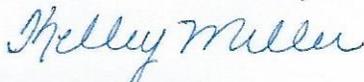

Thank you in advance for taking a few minutes to hear our hearts.

When we heard about the wind turbine projects for the first time (August 2018) we were shocked. How can this be allowed to happen to our property, our community, without us even knowing about it? We don't live under a rock. We go to work, pay our bills (including property taxes) and have been blindsided by this decision made by a few landowner's, commissioners (which 2 are no longer even representing our County) and a company (who doesn't even live in our area).

My husband's family has owned the property on state Route 19 in Republic for over 100 years. We worked for close to 20 years to be able to build our home here, where we intended to live the rest of our lives. We raised 2 daughters here and now have 3 grandchildren that enjoy this land.

We have done intense research about the turbines and the negative effects of their presents in relation to our health. We do not want shadow flicker, wooshing sounds 24/7, nor do we want an Industrial Wind turbine complex in our back yard. Please, we urge you so desperately, do not allow a few land owners to destroy what so many of us have spent our lives working for. Don't we ALL deserve the right to say what We want for the community we choose to call home? Don't we ALL have the right to make our voices heard? Not just the voices that will receive money for their sacrifice.

Thank you again for your thoughtful consideration to this very important situation.

Kelley Miller
