Dear Mr Schreiner and Who It May Concern,

My name is Laura Storm and my family and I reside here in Lyme Township. I made it a purpose to live here because I value the ideals that living in the country offer a family. It encourages a cohesiveness and morality that living in the country helps to mold a family by, particularly its children.

Children have the room and freedom here to enjoy and develop their own individualism. They grow up at their own speed, have the ability to enjoy the outdoors and fresh air... all without any of societies encomberments.

We enjoy the peace and quiet of the area. We love the site of farmers in their fields and the unobstructed view we have across those fields. I can't imagine it being altered with huge wind turbines, that now would mar the countryside.

Our wildlife that is currently being destroyed in various other areas of the world by horrible fires, would suffer. The deer and other animals that have made this area their home would not only be more limited in their resources here, but also our knowledge of them too.

The Bald Eagles that nest here would suffer more than they already do. The ability to see them soaring majestically over our fields, hunting for food and nesting with young in our trees, would be gone. My daughter and I have watched them on several occasions as they spend time flying over the fields here looking for prey. I hate to think about the symbol of America being sacrificed for some wind turbines that can be built in a less populated area, but also the loss of education and growth of our youth as well.

Thank you for reading my letter and please reconsider the wind turbines placement as my family and my neighbors do not want them here. I support SB234 and HB401.

Sincerely,

Laura Storm

To Who It May Concern,

My name is Allison Storm and I live here in Lyme Township with my family. I went to Monroeville Schools and continued my education at BGSU in Bowling Green Ohio. Upon graduation, I moved back home here to my home on Yingling Road.

My home is the place I have enjoyed for many years, with the peace and quiet of the country, the farmers tractors and the animals I have watched in fields and my backyard..... learning that this will be destroyed and disrupted by the Wind Turbines, has made me quite upset and angry that it will no longer be around not only for my family and I, but for future generations as well.

The industrialization of the area around me will only lead to the loss of wildlife, less farm acreage, and less area for people to live. The site line out my window will be destroyed by these huge machines. I will not see deer or the eagles that fly in the field behind my home anymore. There are less populated areas to build that are less disruptive then in my backyard and the yards around me. This will affect everyone and everything in the paths of these turbines.

Please do not destroy the community where I grew up and the future memories of other children of their home. I do not want you to build here. I support HB401 and SB234.

Sincerely,

Senator Steve Wilson
Chairman
Senate Energy and Public Utilities Committee

We are writing this letter in regard to SB 234.

We are farmers in Huron County. My husband has farmed his whole life and his home place is a century farm which has been in the family since 1830. We feel very strongly about the wind turbines coming to the area. We farm in Peru and Sherman townships. We see many bald eagles in our area and enjoy the peace and tranquility of the areas where we live and farm. We enjoy sitting out in our yard in the evenings and watching the birds, etc. We have seen the wind farms in western Ohio and it scares us to think we might have the same thing here. They are terrible monstrosities and the hum is terrible. I think that the voters in these areas should have the opportunity to vote on this, instead of having politicians make a decision for us.

Thank you for your support.

Dear Senator Steve Wilson,

I am writing to you asking for your support for senate bill 234. My husband and I are farmers and landowners in Sherman township, Huron County. We have lived here our whole life. I am 6th generation and he is 5th generation farmer. We see bald eagles almost every day. We deserve the right to vote. Having wind farms should not be decided by land owners and politicians but by the residents affected by them. This day and age it seems crazy that we even have to fight to vote on this matter.

Sincerely,
Deb Burnb

Dear Senator Steve Wilson,

Hi my name is Ashley Fries and I reside at 3889 Peru West Section Line Rd Monroeville, OH 44847, in Huron County, Peru township. I am writing you today as a farmer and a land owner asking for your support on senate bill 234. We believe that it is only fair that the general public have just as much say in wind turbines as the land owners. My husband and I are very much against turbines and will more than likely move if wind turbines come to this area. We have small children and both of our families are rooted here. We hope that wind turbines will not be allowed to ruin the beautiful countryside that we have grown up in and are raising our children in. Thank you so much for your time and please support senate bill 234, so everyone has a say.

Sincerely,

Ashley Fries
