

Senator Steve Wilson, Chairman
Senate Energy and Public Utilities Committee

Senator Steve Wilson:

I am respectfully requesting you and your colleagues support SB234.

This referendum would give the voting power back to the people of local townships, where the power should be. Everyone's situation and circumstances are different. Who would know the landscape, wildlife, karst, etc., better than the residents who live there? Everyone deserves to have a voice in their own neighborhood.

Over time, Apex has increased the size of the original turbines proposed to be built too near occupied homes, woods, and property lines. These industrial turbines will wreak havoc with the bat, bird and wildlife population. Even more frightening are the dangerous effects to the health of our families, friends and neighbors. Where is the regard for human health and safety?

Please give us our vote to protect our families.

Sincerely,

Rhonda L. Zerman
