To Whom It May Concern,

About a year and a half ago we found out that industrial wind turbines were going to be surrounding our home as well as our family and friends homes. We purchased our home in the peaceful country away from towns and industry for a reason. If we had known there would be up to 22 within 2 miles of us we would have moved out the general area. The harm to human health and welfare as well as lowering our property value and ruining the viewshed makes us very upset and sad. We, who live here should be given a voice as to whether or not these industrial turbines take residence in our back yards. Affected townships should have a vote as these are our homes, not an industrial park.

Thank you,

Tom and Shelley Smith
