Are you a Registered Lobbyist?  Yes  No

Special Requests: I am an Ohioan and concerned about climate change. Our country is not doing enough to support alternate sources of energy to fossil fuels, such as wind power. The Ohio legislature should be doing everything it can to encourage not threaten wind farms. I write in opposition to Ohio Senate Bill 234.. ~~SB 234 keeps Ohio in energy sources of the past, not the future such as renewable energy. It is unfair because it treats wind energy different than other energy-generating resources such as natural gas and solar energy power. Ohioans deserve better than this --we want and need renewable wind energy. Oppose Senate Bill 234~~ \_\_\_\_\_
