The I.C.E. System

(In Case of Emergency)

Introducing A Voice 4 U, we speak for you,
when you cannot speak for yourself.

Cutting edge technology based information system. A HIPAA compliant QR code that holds medical information that could be quickly accessed via text or scanning code.

The individual enters only as much or as little as they like.

Questions Answered How it Works

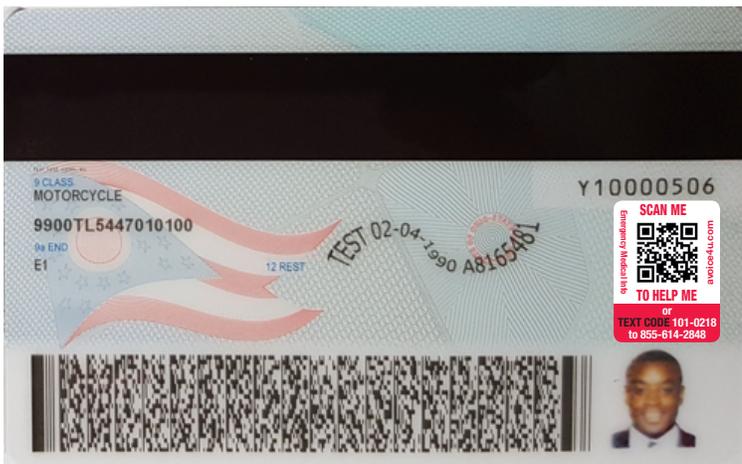

In Case of Emergency, first responders can simply scan the QR code or text a toll free number and instantly, on the screen of their cell phone, receive answers to the following questions:

- Who do we contact for them in case of emergency/next of kin?
- What are they allergic to? (If anything)
- What medications are they currently taking?
- What illness might they be suffering from? (Alzheimer, Diabetes, Epilepsy, etc.)
- What is this person's blood type?
- Is the person an Organ Donor?
- Do they have a living will? And; What additional special instructions they deem necessary to include

Nationwide Standard System

Medical Records for Life

Access for law enforcement

Emergency medical access

Good Samaritan

Transferable to:

Military - VA

(dog tags)

Medicaid card

Medicare card

Insurance card

Student - College I.D.'s

Employment I.D.'s

Foster children I.D.'s

Prison I.D.'s or wristbands

Numerous opportunities also a safety system for traveling nationally or internationally.

Setup is Easy

Create your own emergency record.
Enter only as much or a little as you like.

Receive your own personal QR Code
and personal Text Code that is linked to
your emergency information.

Your personal QR code and Text Code
will be printed directly on the driver license
or State I.D.

In Case of Emergency first responders
or bystanders can scan your QR code
or Text your personal code and view the
information you provided.

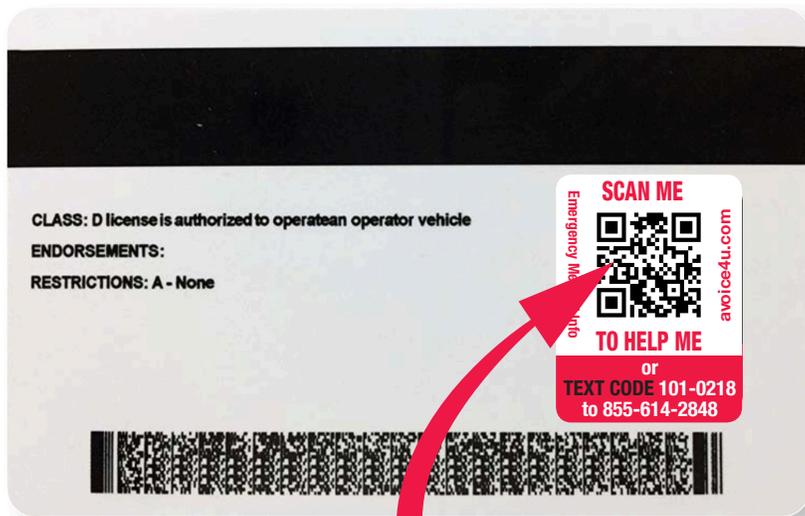

Save precious time by assessing any
important health information.

Update medical information and
emergency contacts as often as needed.

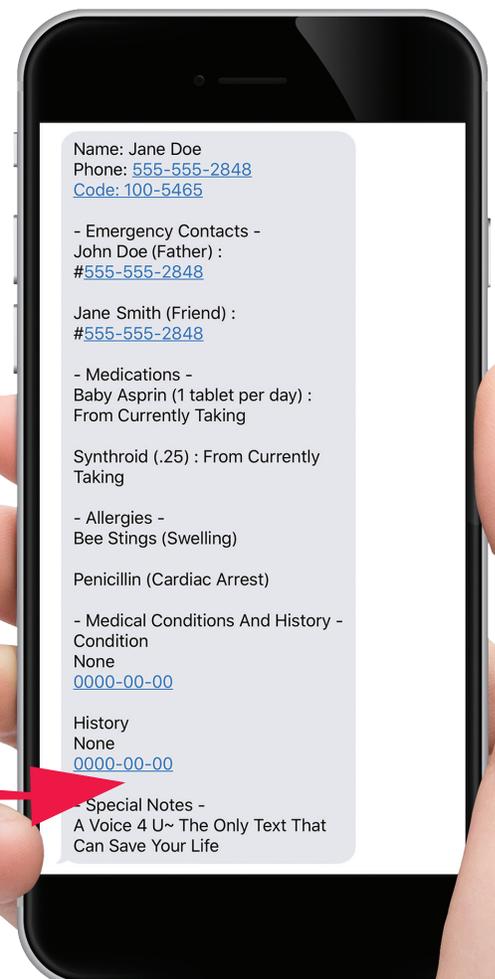

EASY TO DELIVER

With the **I.C.E. system** (the sticker) over a relatively short amount of time the predominant portion of the adult population of Ohio will have this added protection providing them the very best chance of survival if they are ever involved in a medical emergency situation; even if they are unconscious and unable to speak for themselves

Scan this.

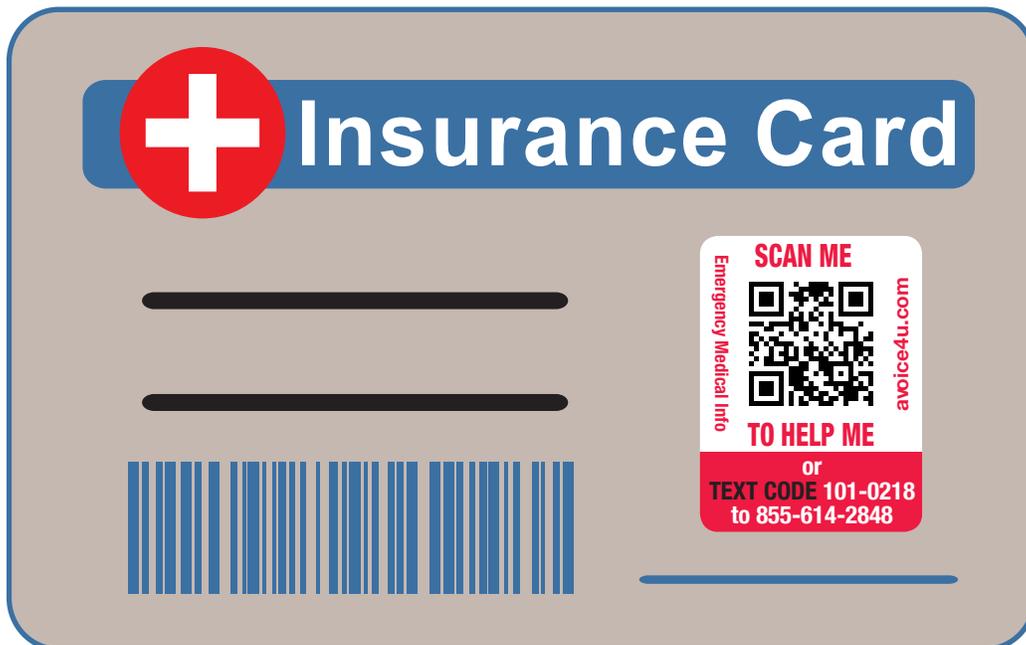

Get this.

TRY IT FOR YOURSELF

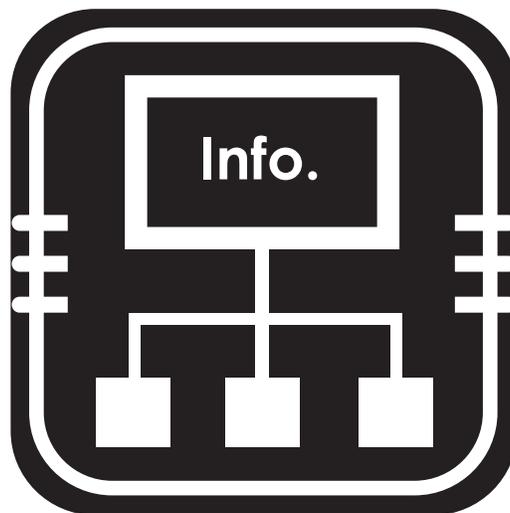

Please scan the QR Code or Text the personal code above to see how quickly and easily the system works.

Note: With updated iphones it's as easy as taking a picture of the QR Code.

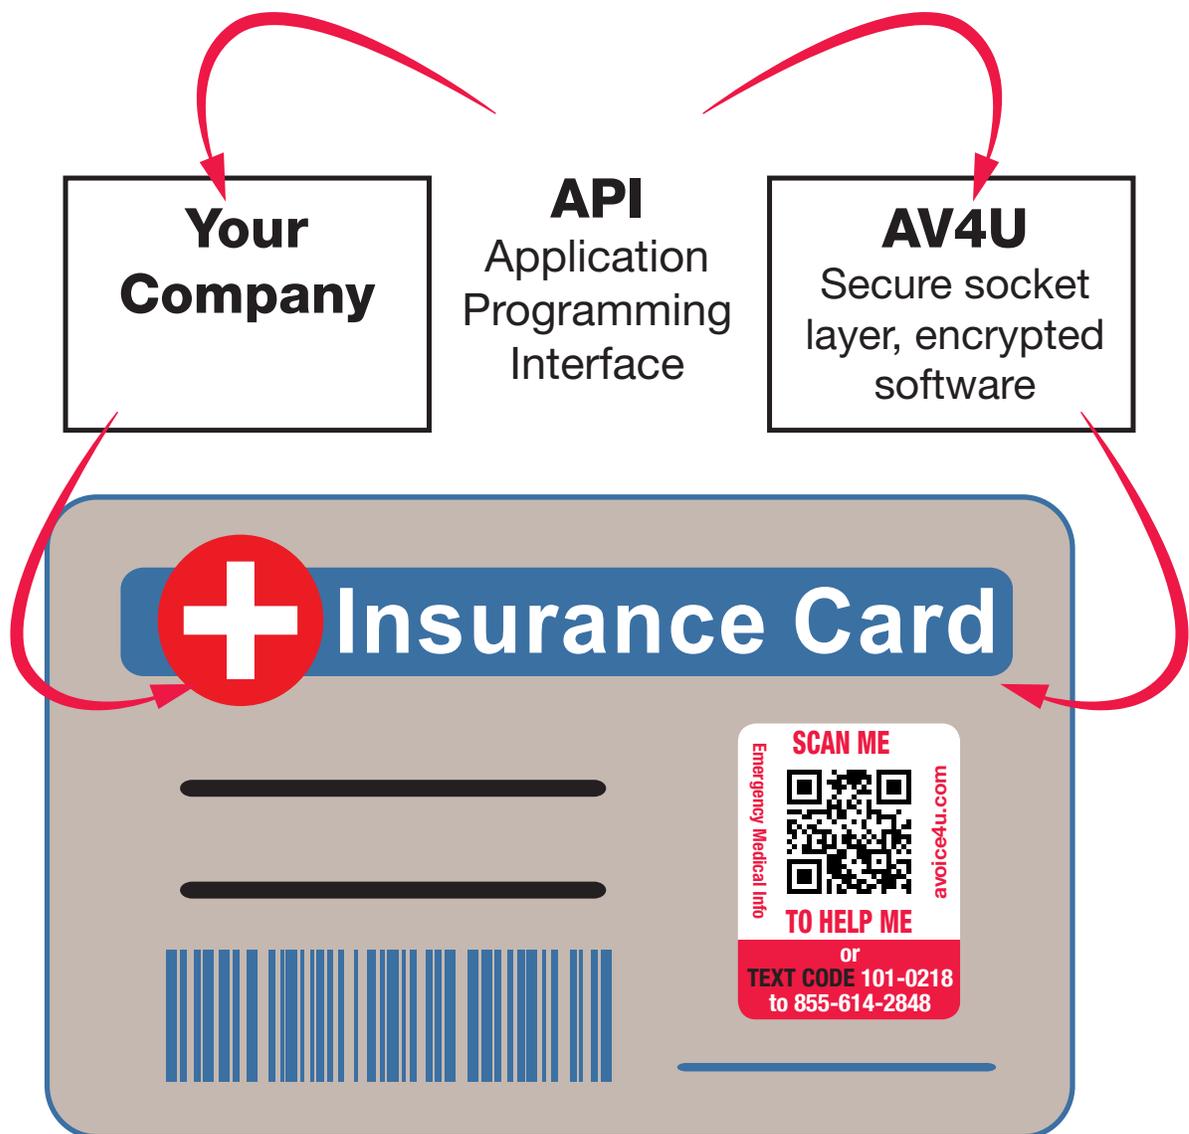

BENEFITS OF SERVICE

- A standardized method for all first responders and hospital emergency room teams to find pertinent emergency information
- Can assist police in determining if the reason for radical driving is due to a medical condition or drugs/alcohol
- In a natural disaster or traumatic situation like at Ohio State, or Las Vegas or as recently as Florida, the standardized method allows pertinent emergency information to be quickly located to assist in emergency care
- **Can potentially help save lives**

API

Neither company will have access to the others backend programming with API. API protects both companies privacy. Your company and AV4U connect and produce the final product.
