

Trey Gowdy once stated: "There are still those who seek to treat the Second Amendment as a Constitutional 2nd class citizen!" He has also many times asked the question: "Is there another Constitutional right that we treat the same way as the 2nd amendment?"

It has been the liberals position that voter ID laws discriminate against the poor suppressing their right to vote. That would mean current CCW permit laws is discrimination on steroids! 14 states already have constitutional carry and Vermont has had it since 1791 with no adverse effects. Open carry is currently legal yet bullets don't magically become more accurate because you wore it open! The only difference between open carry and concealed carry is one is way more expensive!
