As Introduced

132nd General Assembly Regular Session 2017-2018

H. R. No. 85

Representative Young

A RESOLUTION

То	respectfully urge Congress and President Donald	1
	Trump to amend the Federal Clean Air Act to	2
	eliminate the requirement to implement the E-	3
	Check Program and direct the Administrator of	4
	USEPA to begin new rule-making procedures under	5
	the Administrative Procedures Act to repeal and	6
	replace the 2015 National Ambient Air Quality	7
	Standards; to respectfully urge Congress and	8
	President Donald Trump to pass legislation to	9
	achieve improvements in air quality more	10
	efficiently while allowing companies to innovate	11
	and help the economy grow; to urge the	12
	Administrator of USEPA to alleviate burdensome	13
	requirements of the E-Check Program and the Clean	14
	Air Act if Congress and the President fail to	15
	act; and to encourage OEPA to explore	16
	alternatives to E-Check in Ohio.	17

BE IT RESOLVED BY THE HOUSE OF REPRESENTATIVES OF THE STATE OF OHIO:

WHEREAS, The E-Check Program administered by the Ohio	18
Environmental Protection Agency (OEPA) imposes burdensome and	19
costly motor vehicle emissions testing requirements on the	20
citizenry of Northeast Ohio and wastes Ohio's valuable tax	21

dollars; and

WHEREAS, The E-Check Program has a disproportionate impact on poor and lower and middle class citizens because such citizens are more likely to own older motor vehicles that are subject to the E-Check Program, and those vehicles are more likely to fail an emissions test under the Program. In many cases, a vehicle that is subject to the E-Check Program is the only mode of transportation available to an individual and is vital for maintaining employment, making doctor visits, purchasing food and other necessities, and living a stable and normal life; and

WHEREAS, E-Check inspectors indicate that older vehicles function well and produce minimal pollution but, nonetheless, fail E-Check emissions tests. Often, this is due to antiquated on-board computers that malfunction more frequently. Thus, in such cases, E-Check results in eliminating an individual's only mode of transportation simply because of an inconsequential computer malfunction that is not related to actual emissions or increased pollution; and

WHEREAS, Air quality throughout the United States has improved significantly and dramatically from 1970 to the present day. For example, USEPA found that by 2015, the combined emissions of six common pollutants (including carbon monoxide, lead, nitrogen dioxide, and volatile organic compounds) had dropped 71%. This progress occurred while the U.S. population and economy continued to grow, Americans drove more miles, and energy use increased; and

WHEREAS, Many tests indicate that no measurable improvement in air quality is achieved through implementation of the E-Check Program. Many experts believe that improved technology by automobile manufacturers has reduced motor vehicle emissions much more effectively than government-imposed emissions testing. 22

52

For example, according to University of Denver Senior Research 54 Engineer Gary Bishop, emission testing "costs lots of money" but 55 "does almost nothing to clean up the air." Bishop has pioneered 56 many new methods of emission sensor testing and found that in 57 Tulsa, Oklahoma, which has no emission testing program, 58 emissions were no worse than in areas with strict emission 59 testing regimes. Other reports, such as a recent State of 60 Colorado audit, conclude that the "public need" for emissions 61 testing is "uncertain" and recommend exempting vehicles from 62 model year 2001 onward. In Ohio, implementation of this 63 recommendation would result in almost total elimination of E-64 Check because Ohio does not test vehicles more than 25 years 65 old. Thus, only vehicles built between 1991 and 2000 would be 66 subject to testing under the E-Check Program; and 67

WHEREAS, The Federal Clean Air Act requires geographic areas within states that are classified as nonattainment for specified criteria pollutants to implement emissions reduction strategies including, in some circumstances, vehicle emissions testing programs; and

WHEREAS, The Northeast Ohio area is currently in attainment status based on the most recently available air quality monitoring data; however, OEPA continues to require the implementation of the E-Check Program, notwithstanding that other alternative emissions reduction strategies are available; and

WHEREAS, Through rulemaking, USEPA has made the emissions79standards for certain criteria pollutants more stringent,80thereby threatening Northeast Ohio's attainment status; and81

WHEREAS, In particular, the stringency of the 2015 National82Ambient Air Quality Standards (NAAQS) directly impedes the83progress Northeast Ohio has made in reaching attainment status.84Northeast Ohio was redesignated as attainment for ozone under85

77

the NAAQS that were established in 2008. As part of that 86 redesignation, Ohio amended its state implementation plan under 87 the Clean Air Act to provide for the maintenance of the ozone 88 standard in Northeast Ohio for ten years. The plan includes E-89 Check as one of the methods for maintaining that ozone standard 90 in Northeast Ohio. If Ohio wants to eliminate E-Check in 91 Northeast Ohio, it must show that its elimination would not 92 interfere with any applicable requirement concerning attainment 93 or result in any "backsliding" of attainment status. In 2015, 94 USEPA made the standard for ozone more stringent. The result is 95 that Northeast Ohio is unjustly subjected to an unattainably 96 harsh standard that has changed course mid-stream, which makes 97 it difficult to ever eliminate the E-Check Program in that area; 98 and 99

WHEREAS, The chronological proximity between the 2008 and1002015 revisions to the NAAQS and frequency with which NAAQS are101revised does not give Northeast Ohio and other areas an102opportunity to properly devise a plan to reach attainment status103or any assurance that attainment status will not be interfered104with. Thus, planning ahead in order to comply with the105requirements is impossibly difficult; and106

WHEREAS, The inability to implement viable alternatives to E-Check unjustly results in the continued implementation of the E-Check Program in Northeast Ohio; and

WHEREAS, The E-Check Program is currently in place in seven 110 counties in Ohio, all in Northeast Ohio. Implementation of the 111 Program costs Ohio about \$10.6 million dollars per year. As a 112 result of the 2015 NAAQS, it is projected that at least one 113 other major area, Southwest Ohio (including the areas of 114 Cincinnati and Dayton), will be required to implement the E-115 Check Program or find other reductions in emissions by 2020. If 116 Southwest Ohio implements the E-Check Program, Ohio's total 117 costs may be as high as \$25 million per year. It is also 118

Page 4

107

108

possible that the 2015 NAAOS will cause other areas of Ohio to 119 fall out of attainment status, thus, increasing the costs even 120 higher. While the purported purpose of the E-Check Program is to 121 contribute to a cleaner environment, it appears that Ohio's tax 122 dollars would be better spent on more effective environmental 123 programs such as saving Ohio's nuclear industry, providing 124 subsidies to wind and solar projects, or improving water quality 125 in Lake Erie; and 126

WHEREAS, Prevailing winds from manufacturing areas to the127west of Northeast Ohio, such as Chicago, Detroit and Toledo, can128increase air pollutants in Northeast Ohio, and, in addition, car129and truck travel on interstate highways, such as Interstate 90130and the Ohio Turnpike, to and through the area regularly results131in increased air pollution; now therefore be it132

RESOLVED, That we, the members of the 132nd General133Assembly of the State of Ohio, respectfully urge Congress and134President Donald Trump to do all of the following:135

-- Amend the Federal Clean Air Act to eliminate the 136 requirement to implement the E-Check Program; 137

-- Direct the Administrator of USEPA to begin new rule138
making procedures under the Administrative Procedures Act to
repeal and replace the 2015 NAAQS and prohibit the Administrator
from revising the NAAQS more than once every fifteen years;

-- Introduce and pass legislation to achieve improvements in air quality while allowing companies to innovate and help the economy grow; and be it further

RESOLVED, That we, the members of the House of145Representatives of the 132nd General Assembly of the State of146Ohio, urge the Administrator of USEPA to alleviate burdensome147and unproductive requirements of the E-Check Program and the148Clean Air Act if Congress and the President fail to act, and149

Page 5

142

143

encourage OEPA to explore alternatives to E-Check in Ohio and to	150
reallocate money used for the E-Check Program to other	
environmentally beneficial programs; and be it further	
RESOLVED, That the Clerk of the Ohio House of	153
Representatives transmit duly authenticated copies of this	
resolution to the members of the Ohio Congressional delegation,	
the Administrator of the USEPA, the Director of OEPA, the	
Executive Office of the President of the United States, and the	
news media of Ohio.
