

Members of the House Federalism & Interstate Relations Committee:

I have attached a form that includes a very brief statement urging you to pass the Health Care Interstate Compact. I added more information below.

As a Georgian, I was very proud when Georgia became the first state to pass the Health Care Compact. I strongly believe that states should be the ones to regulate Health Care on behalf of their citizens - not a one size fits all Federal government regulatory system. State governments are more closely aligned with the needs of their citizens.

I am one of the 22 Co-founders of the national tea party movement that was founded in February of 2009. I have served on the Board of directors of Tea Party Patriots since October of 2009. The Federal takeover of our health care system has harmed Americans like myself that can no longer afford health insurance. My health insurance premiums have doubled in price since ObamaCare was passed. ObamaCare has negatively impacted far more Americans than it has helped. I encourage you to protect the needs of Ohio citizens by passing the Health Care Compact.
