

# TRANSPORTATION & WORKFORCE ACCESSIBILITY

March 8, 2017 Meeting

Josh Miller

## OVERVIEW

Growing companies in the primary job centers of Columbus and beyond are facing labor shortages. Meanwhile, a significant talent pool is motivated and driven to meet the demand however the lack of fast and reliable transportation poses a serious hindrance in connecting the two.

### Objectives

- Summary of the data
  - Where are the jobs versus the motivated labor pool?
- Transportation stats
  - Time briefing of transit times to job centers
  - Cost briefing of transit times to job centers, including opportunity costs
- Improving transit options versus shifting the labor pool
  - Why the latter does not work
- Future growth patterns in population and job centers
  - Identify the need... How will these be addressed by the highway system without an embrace of alternative, fast options?
