

I'm in favor of the nuclear bailout but against gutting the clean energy standards, But Ohio should encourage the U. S. Government to make the nuclear waste repository available.

I don't understand why this has to be complicated. And I personally am happy to pay a small fee every month (\$1.65) on my City of Columbus Division of Electricity bill for a clean energy surcharge they call Ecosmart Choice. So it's not like I'm trying to get others to pay a surcharge I'm not willing to pay myself.
