

Dr. Ean Bett's Testimony

June 5, 2019

To whom it may be concerned,

As a physician, Ohio resident and American, I am strongly in opposition to House Bill 178. The ability for my fellow citizens and myself to potentially carry firearms, which are designed to be lethal, in a concealed manner in public, will only create further fear in our communities at large.

Passing House Bill 178 would be a massive step in the wrong direction for our State's safety and health. As a physician, it is my duty and ethical responsibility to promote safety and health, and I therefore staunchly opposed House Bill 178.

Ean Bett, MD
