

I am opposed to AGAINST HB680 because it works AGAINST early voting options in the case of a continued emergency. It makes the vote-by-mail process more complicated by preventing the Secretary of State from mailing absentee ballot applications to all Ohio voters; prevents the Secretary of State from using federal funds to pay return postage on ballot applications and ballots; reduces the amount of time available for early voting and voting by mail; requires any emergency adjustments in the voting process to be determined 60 days in advance; and allows the legislature to override any such decision.
