

I'm writing to you today to ask that you not pass SB311. During a pandemic, we are most in need of trained medical professionals who will make decisions based on science and our well being. SB 311 weakens Ohio's Health Director at the time when we need them most. It will let untrained state legislators overrule medical professionals. Ohio's early success in slowing this pandemic's curve was an example of what a knowledgeable team could provide us. The bias of extremist politicians should not be the deciding factor of our health and welfare! Please vote no on SB311
