

As a resident of Worthington Ohio I ask you to vote against SB311. Sounds like it would make it impossible to implement stay at home or quarantine orders to prevent the spread of covid. That's the opposite of what we need right now. My husband works for a large hospital in Columbus and they're getting overwhelmed with covid patients. They've got teams of colonoscopy doctors and nurses who are now caring for covid patients instead. A lot of people are going to die. Please do something to help slow covid, not something that will tie the hands of public health officials.

Thanks

Kathleen Knight
