Ohio House of Representatives  
1 Capitol Square  
Columbus, OH 43215

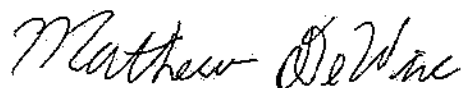

Members of the Ohio House of Representatives:

Lordstown Motors is pleased to offer support to HB 202, introduced by Representatives Smith and Weinstein, to create an electric vehicle infrastructure study in the state of Ohio. The creation of a comprehensive electric vehicle infrastructure study will ensure Ohio is at the forefront of this new innovative technology and a leader in all future technologies.

Lordstown Motors' mission is to create a better future through clean energy, innovation, and job creation. HB 202 is a sign that the State of Ohio shares that same mission with Lordstown Motors and is committed to the future.

As an electric vehicle manufacturer, Lordstown Motors is aware of what will impede progress, and therefore impede job creation and innovation. Electric vehicle implementation is not possible without the supporting infrastructure, and the first step to achieving the infrastructure piece is to identify what needs to be done. For those reasons Lordstown Motors is fully supportive of HB 202 and looks forward to seeing an advance in electric vehicle infrastructure down the road.

Respectively yours,

Matthew DeWine
